

## NCW-120 Horizontal Die Spotting Press

### Description:

The NCW-120 hydraulic die spotting press machine is mainly applied in repairing and assembling of various plastic mould, or hardware casting mold. It can turn from 0-90 degree and it is especially suitable for medium and small-size mould. The max pressure it can endure is 120T. NCW-120 hydraulic die spotting press machine replaces manual hammering, which improves work efficiency and precision. Besides, it ensures the moulds without burrs because of protection device.

### Features:

#### 1. High precision

Hydraulic system adopts vibration-absorption facilities, to reduce hydraulic impact and ensure precision of facilities.

#### 2. Low-pressure protection facility

NCW-120 hydraulic die spotting press machine is equipped with low-pressure protection facility, to prevent damages caused by collision and insertion.

3. Good red lead can be achieved because impact is produced by die spotting with high speed.

Rating Protection

## Parameter:

Model	NCW-120
Max pressure (T)	120
Die opening space (mm)	1650
Max stroke (mm)	1400
Max capacity size (mm)	800×800
Fast forward/fast backward speed (mm/s)	70
Tool feed speed/tool feed speed (mm/s)	<25
Electric permanent magnetic force (T)	36
Turnover capacity (T)	3
Angle(degree)	0-90
Motor power (KW)	7.5
Machine size (mm)	1400×1200×4800
Machine total weight (T)	11
