

## NCW-70 Horizontal Die Spotting Press

### Description:

The horizontal mold spotting machine is usually applied for adjusting and maintenance of mold. The series NCW-70 is a newly-developed machine by our company. The mold can turn from 0°-90 °.And it is mainly used for medium and small size mould. The delay protection function of NCW-70 horizontal mold spotting machine ensures the moulds without burrs.

### Application:

NCW-70 horizontal mold spotting machine is used in repairing and assembling of various plastic moulds, or metal die-casting dies.

### Features:

#### 1. High precision

NCW-70 horizontal mold spotting machine adopts vibration-absorption facility, to reduce hydraulic impact and ensure precision of facilities.

#### 2. Low-pressure protection facility

Hydraulic system is equipped with low-pressure protection facility, to prevent damages caused by collision and insertion.

#### 3. Good effect of red lead

E-mail:nice@nicemachine.net / alicem@nicemachine.net

Good effect of red lead can be achieved because of high-speed die spotting.

#### 4.Complete safety facilities

NCW-70 horizontal mold spotting machine is equipped with many safety devices to ensure men's security, like safety grating, anti-falling oil cylinder, locking cylinder and safety supporting frame and other prevention facilities.

Anti-Falling Facilities

Locking Facilities

Safety Supporting Facilities

Rating Protection

### Parameter:

Max pressure	NCW-70 horizontal mold spotting machine
Die opening space	1250mm
Max stroke	1000mm
Max capacity size	600x600mm
Fast forward / Fast backward speed	70mm/s
Tool feed speed / Slow feed speed	<25mm/s
Electric permanent magnetic force	27T
Turnover capacity	1T
Angle	0-90degree
Motor power	5.5kw
Machine size	1000x1000x4200mm
Machine total weight	6T
